HANDI MIC PRO PLUS

HANDI MIC PRO PLUS

The Heil Handi Mic is only 4" tall. It has been designed with a very special open rubber shock mount that puts the various Heil microphone elements in the open, not encased in a shell. The result is the elimination of the hollow, clamshell sound.

The Handi Mic Pro Plus was developed for a live stage or any recording application where a small footprint is necessary. The microphone fits easily into drum kits or roto toms. It can also be mounted inside Leslie speakers or used as a walk up soloist mic.

This microphone was designed for close range uses. We recommend having audio sources approximately 2 inches from the end grill for best results.

The Handi Mic is shipped with a 5/8" - 27 mic clip and a foam windscreen.

Output Connection	3 pin XLR
