PRO SET 3

Dual side professional headphone brings exceptional articulation and clarity, beautiful sonic accuracy in a closed back, lightweight headset for monitoring in recording and broadcast studios, amateur radio stations, podcasting and computer outputs.

The HEIL Pro Set 3 features high quality 40 mm neodymium magnets and voice coils, lightweight, ergonomically designed cushioned headband adjustable for maximum comfort while significantly reducing outside noise. Supplied with three detachable cables. 1.8 M flexible straight cable. 1.8M straight cord with mating iPhone/iPod compatible 3.5mm plug. 3 M coil cord - all twist lock terminating in a 1/8" (3.5 mm) professional gold plated screw-on 1/4" (6.3mm) adapter.

To adjust the pressure of the ear pads simply grip the flexible stainless steel band and stretch the headband into a straighter position and the earpads away from one another.

The plush earpads of the Pro Set 3 can be rotated to align with your ears and allow maximum comfort for long periods of use.

The Heil Phase Reversal switch acoustically moves the signal, which creates a spatial widening of the sound field. Reversing the phase between the speakers creates a wider acoustic platform and helps to eliminate listener fatigue when in use for long periods of time.
